Subject: Resolution 2011-098

Good morning Assembly members

Resolution 2011-098 encouraging governor Parnell to fund the line extension from Anchor Point to Kachemak city is a worthwhile effort. Several years ago the residents of Kasilof tried to form a USAD for natural gas. With some clever political maneuvering the borough assembly denied our request. The pressure regulator is already in and the Kasilof system has already been engineered by Enstar Natural Gas. I think that it would be quite neighborly of the assembly to include the Kasilof project in the resolution to governor Parnell. Nikolaevesk received full funding for their natural gas system so it appears the the governor is ok with small energy projects.

Thank you
